A manual transmission requires the driver to operate the gear stick and clutch in order to change gears (unlike an automatic transmission or semi-automatic transmission, where one (typically the clutch) or both of these functions are automated). Most manual transmissions for cars allow the driver to select any gear ratio at any time, for example shifting from 2nd to 4th gear, or 5th to 3rd gear.

The Chrysler-ZF partnership According to Mike Kirk, Chrysler's director of axle, driveline, and manual transmissions, there were two main reasons for Chrysler's changes to the ZF automatics. Kokomo was already set up with its own tooling and robotics, which are different from those used by ZF. Some changes to the transmission were made so they ...

When parts are replaced in a transmission or the fluid is changed, resetting the transmission's adaptations may become necessary to restore shift quality. The ZF 6-speed automatic used in many E90-based vehicles like the 335i, X1, and 135i (among others) is an expensive transmission, and fluid replacement with an adaptation reset can be a great way to extend its life. This article should apply ...
